

Afterlife & Agency — A Neutral Mapping

Purpose

Offer a gentle, operational frame for discussing afterlife teachings without adjudicating metaphysical truth-claims. We compare how teachings guide agency under shared rails: proof before power (coverage ≥ 1), rescue before speed ($S < 1$), and thin carry (≤ 12 bindings, per-slice $d \leq 3$).

What this framework can / cannot say

Can: Evaluate practices by outcomes: do they raise the weakest limb, keep harm reversible, and keep power pause-able? Map distilled virtues/procedures to the carry-core; rituals/stories to mulch or museum.

Cannot: Decide metaphysical realities (souls, heavens, rebirth, judgement). We only test operational behavior.

Translation keys (neutral)

Horizon-Sigil (■): rites of passage framed as compression+release with receipts (conservation, compression κ , rollback plan).

Carry-Core: minimal virtues/vows/procedures that are verifiable and reversible; fit through ≤ 12 bindings.

Mulch: seasonal rituals/stories that nourish locally but do not demand rate control.

Museum: identity/lore preserved with provenance; non-binding on actuation.

Illustrative mappings (non-exhaustive, non-hierarchical)

Tradition family	Carry-core (examples)	Horizon-Sigil analogue	Caution (rails)
Abrahamic	Justice–mercy; care for vulnerable; confession+release	Passive-resp/ritual rites with restitution	Avoid punitive zeal without rollback
Buddhist/Jain	Non-harm; compassion; right speech/act	Admiral rites; merit as community	Avoid fatalism that starves rescue
Hindu	Dharma duty; ahimsa; dana	Antyesti rites; return cycles	Guard against dispossession via status
Indigenous/Ancestral	Kinship reciprocity; land care; ancestor honoring	Mooring/return to land with receipt	Future no-dispossession; consent at seams
Stoic/Confucian	Virtue practice; propriety; filial care	Ritual propriety around death	Prevent ritualism without rescue of least-served
Secular humanist	Dignity; rights; evidence-led repair	Healthcare/memorial ethics; organ donation	Avoid utilitarian moves without rollback
Transhumanist/Techno	Safety; reversibility; autonomy	Deletion/rectification; proof-pace	Cap sealed immortality (no exit, no forum)

Five self-assessment questions (for any community)

- What is the smallest “shape” (virtue/procedure) you would carry through any era?
- How do we undo harm if zeal misfires (rollback plan, restitution)?
- Who rises after our rites? Show the weakest-limb lift with receipts.
- Where are our husks (extractions without release)? How will we sigil or retire them?
- How thin is our carry? Reduce concurrent bindings; promote invariants to common standards.

Red lines (safety/peace)

- No sacred rankings or coercive syncretism. Concord $\neq$ command.
- No sealed authorities: no actuation without receipts or reversal.
- No side-channels across seams; pause/delete/rectify must work.

Rails: proof before power ($c \geq 1$), rescue before speed ($S < 1$), thin carry (≤ 12). This brief honors diverse metaphysics while comparing operational care outcomes.
